2. CITATIONS AND EXPLANATIONS

Claims 1, 29, 41, 71, and 84 lacks novelty under PCT Article 33(2) as being anticipated by Basore et al. (5,752,232).

Regarding claims 1, 29, 41, 71, and 84, Basore et al. disclosed an interacting method between a computer and a remote device wherein establishing a communication between the computer and the remote device, receiving an audio signal request from the user, processing the audio signal to determine a desired function, and providing a spoken response to the user by way of the remote device and performing the desired function responsive to the audio signal (fig. 1-3, col. 2/ln. 18-col. 6/ln. 24).

Claims 2-28, 30-40, 42-70, 72-83, and 85-86 lack an inventive step under PCT Article 33(3) as being obvious over Basore et al. (5,752,232).

Regarding claims 2-28, 30-40, 42-70, 72-83, and 85-86, Basore do not specifically disclose methods of communicate through a cellular network, voice over internet protocol. However, such communication methods, as stated above, are well known in the art. Therefore, it would have been obvious to one of ordinary skill in the art to utilize such communication methods, well known, to the communication system of Basore to provide flexibility in cost saving, faster transmission data, and effectively allocate bandwidth resources.
